

# P5 & P1200

High-Efficiency Replacement Air Filters

## Effectively Reduces:

- Pollen
- Mold
- Dust
- Pet Dander

P1200

P5

MERV 8, 11 & 13

- P5 (Purolator 2000) is replacement filter for the TRION Air Bear®\*\*
- P1200 is replacement filter for the TRION Air Bear Cub®\*\*
- Designed for home and light commercial use where particles in the 5 micrometer range and larger are present
- Reduces dust accumulation on household furniture
- Reduces maintenance cost of home heating and air conditioning systems
- **Increases filtration efficiency** - improves IAQ
- Moisture resistant beverage board frame with double wall construction
- Unique face board design lowers initial static pressure

\* Air Bear® is a registered trademark of Trion. The names used here are merely to identify the type of products comparable to this filter.

With proper and continuous use, the P5 (Purolator 2000) and P1200 will capture pollen, dust, tobacco smoke residue, grease and pet dander which usually collects on furniture, windows, and carpets from the household environment. You will quickly notice a difference in the air quality of your home - fresher indoor air, less dust, pollen, and spores.

The P5 (Purolator 2000) and P1200 serve as effective replacement filters in home heating/air cooling system cleaners such as those manufactured by Trion - Air Bear® and Air Bear Cub®. Insist on the P5 (Purolator 2000) and P1200 for high-efficiency, quality construction materials, workmanship and performance.

# PUROLATOR P25

## Replacement Cartridge for the Honeywell F25

**Equal to** or better than Original Equipment Performance

### Features

- **Delivering up to 98%** efficiency on 5 micron and larger particles.
- **Reduces dust** accumulation on household furniture.
- **Reduces maintenance** cost of home heating and air conditioning systems.
- **Increase filtration** efficiency & filter life up to six months.
- **Moisture resistant beverage board** frame with double wall construction.
- **Unique face board** design lowers initial static pressure.

Product ID	Size	Purolator	Honeywell
P25	16x25x5	P25-1	203719
P25	20x20x5	P25-3	203721
P25	20x25x5	P25-2	203720

### Suggested

Air filter media shall be (5") deep, medium efficiency, pleated media, disposable panel type. The filter media shall be self-extinguishing non-woven cotton and synthetic fibers. The filter media shall be bonded to a 28-gauge corrosion resistant, expanded metal support grid with a 95% open face area.

Filters shall have a rated average arrestance of 93% when tested in accordance with ASHRAE 52.1-1992 Test Standard. The filter shall be listed and rated Class 2 by Underwriters Laboratories, Inc.

With the increased awareness of indoor air quality, many consumers are looking for higher efficiency air filtration products. The Purolator P25 captures more particles in the air than a traditional one-inch disposable filter.

Over 99% of airborne particles are visible only with a microscope. Visible dust is only 1% of the particles in the air. The smaller airborne contaminants can coat wall, carpets and drapes, and even damage the efficiency of your heating and cooling system. Where do all these particles go that are trapped in the filter? In the trash, with the P25. Just removes the old filter and drop in a new one. Your hands never touch the contaminated filter media.

Because the P25 is enclosed in its own frame, installation is simple and easy.

### Frame

The P25 filter elements are enclosed in a two-piece, heavy duty, high wet strength beverage board frame. The double wall frame forms a rugged, durable filter, which will not warp, crack or leak.
