

• **Pleated Air Filters** The industry standard for performance and value for over 30 years

• **Gain 1 Point toward LEED Certification** - During the process of new construction, install MERV 8 filters at each return air grille for air handlers used during construction. Conduct a two-week building flushout with new air filters and 100-percent outdoor air prior to occupancy.

Nobody Sells More Pleats than Purolator. Here's Why...

Quality Engineered

Proprietary MERV 8 Media - Developed to deliver consistent performance.

The heart of the product. Purolator medias are manufactured to exclusive specifications produced only for Purolator. Nobody pays more attention to media specifications than Purolator. Rigid requirements for resistance, efficiency, MERV values and dust holding capacity are verified by QC checks on incoming raw materials, production line sampling and field audits of finished goods.

Mechanical Media - Purolator Pleated Air filters are made with 100% synthetic fibers providing mechanical efficiency to achieve a MERV 8 performance. Purolator Pleated Air filters maintain a MERV 8 performance before and after a conditioning step. The MERV 8 media has a PVA (Polyvinyl Acetate) adhesive that is not affected by mold or microbial growth.

Heavy Duty Beverage Board Frame - Moisture resistant, sturdy frame material stands up to rough handling, difficult service conditions, long service life. The new 7-strap die cut pattern increases contact points between the beverage board and die cut by 50%.

All Defiant Mark 80-D filters are designed with a consistent pleat shape on predetermined centers causing dirt to collect evenly over the entire surface of the media. Fully utilizing every square inch results in a slow steady rise in resistance for maximum dust holding capacity.

Exceeds ASHRAE Standard 62 air cleaning specifications for filters installed upstream of cooling coils.

Two Piece Frame Construction - Double wall thickness around the outer edge and integral die cut cross members provide strength and rigidity. Purolator Pleated Air filters will not rack, warp or bend under normal handling or operating conditions.

Pleat Stabilizers - The 4" deep filters are designed with individual die cut fingers that separate and stabilize each pleat. Consistent pleat alignment enhances dust holding capacity for longer service life.

Water Repellent Adhesive – Adheres Even When Wet

The adhesive used to bond the frame and media pack into a unitized assembly is highly water repellent. The pleats hold together even when wet. No delaminating, excessive buckling, or collapsing.

Galvanized Steel Pleat Support - Prevents Rust

The Purolator expanded metal pleat support grid is made of galvanized steel for maximum rust resistance. The metal grid maintains pleat shape and prevents fluttering in operation. Consistent pleat shape minimizes resistance and improves dirt loading characteristics throughout the life of the filter.

Consistently Produced

Uniform Pleat Shape - Holds More Dirt

Consistent pleat shape produces optimum performance. Sophisticated production control techniques ensure consistent pleat count, pleat height, pleat shape and spacing.

100% Adhesive Application - Ensures Filter Integrity

The inside of the die cut frame is completely coated with adhesive to ensure a solid bond at all points of contact. The die cut boxes are bonded to each other. The media pack is sealed inside the frame and the pleat tips are bonded to the diagonal support members.

Competitively Priced

Ask your Purolator representative for a quote today.

Two mating pieces of die cut beverage board form a double wall frame around all four edges of the filter. Defiant Mark 80-D filters will not rack or warp under normal operating conditions.

Largest Inventory (*Nobody stocks more pleats than Purolator.*)

We know ready availability is critical to meeting your needs for clean air. All our Distribution Centers are kept fully stocked with pleats the year round.

Compare the performance and value of Defiant Mark 80-D pleats to other types of filters including disposable panel filters, ring panels, pads and frames or permanent filters for efficiency, low resistance, high dust holding capacity, durability and price. The Defiant Mark 80-D line has lower resistance to air flow to aid in your energy savings goals and objectives.
